

Infoman AG is a consulting and solution company for the high tech manufacturing industry. The work of sales persons and of consultants includes a lot of traveling to customer sites.

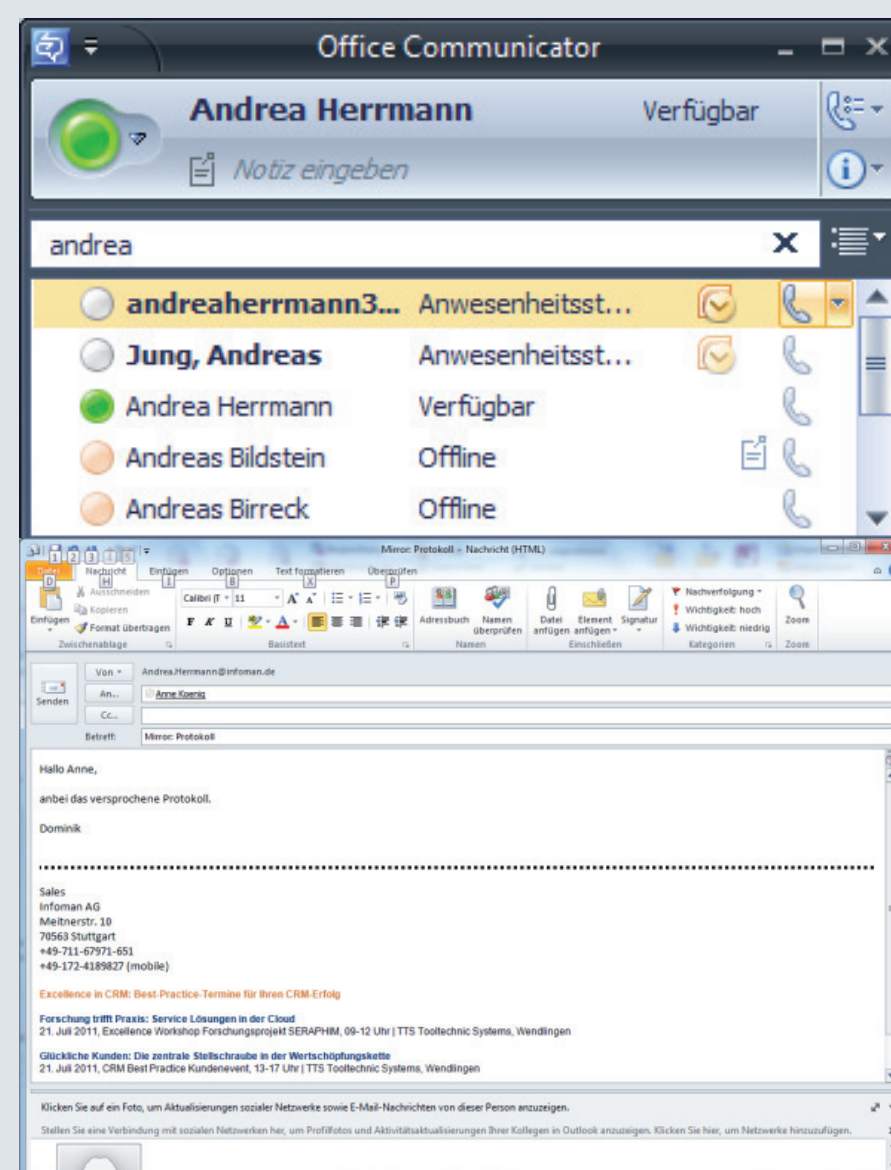

Story Task Detection App

1

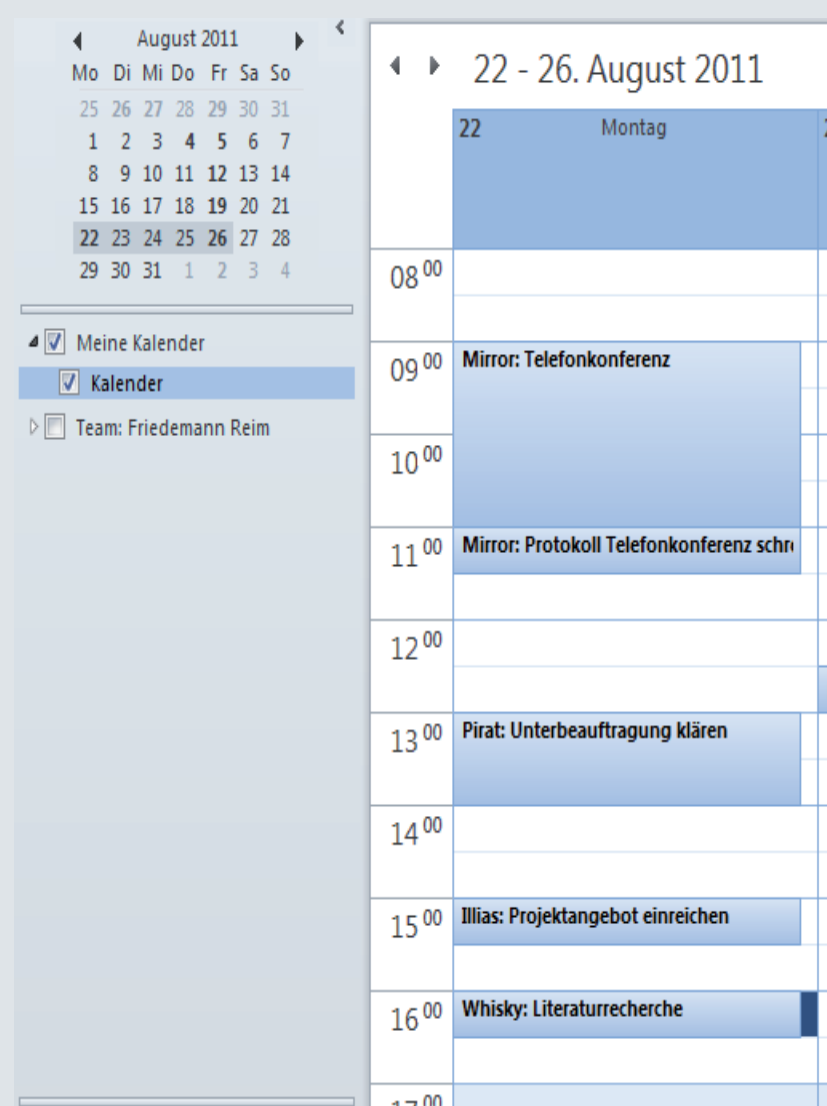

Dominik, a salesman, realizes that he is always busy, and in the evening he wonders where the day has gone.

The TaskDetector (TD) automatically helps him to find out where his time has gone.

2

Dominik can learn even more when he compares his tasks performed with tasks planned in his personal calendar.

3

Dominik meets with his colleagues in a time management workshop. They compare their statistics and share Best Practices with each other.

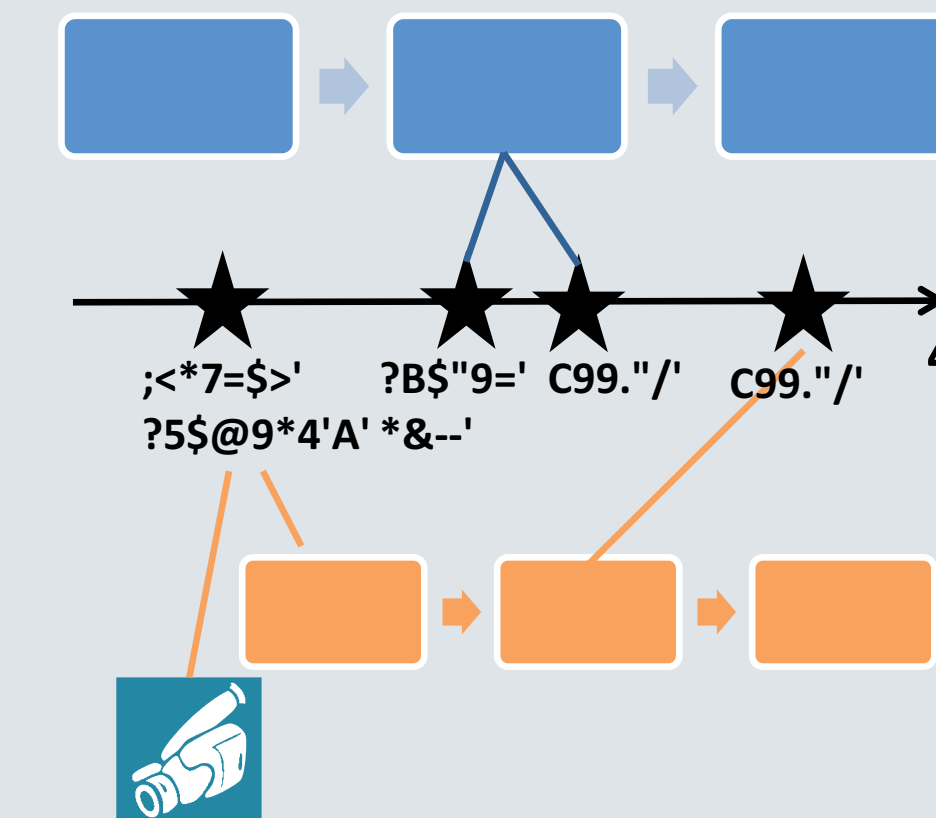

Story Timeline App

1

Margret works in the marketing.

The Timeline App visualizes Margret's experiences on her mobile phone as a timeline with milestones.

2

Margret discusses her timeline with her supervisor. Her supervisor has also documented a timeline.

Jointly, they conclude about further steps to be taken by Margret or training need.

3

In a team meeting, Margret and several colleagues present selected parts from their timelines to discuss Lessons Learned together.
