»Reflection In Action« through MIRROR AppSphere

Looking to improve high-end medicine through the MIRROR, 284 Beds, 480 Employees

Application Case:

A selected hospital owners in Germany will serve as a testbed site. Pilot area: Stroke Unit with Physicians, Nurses and Therapists

Motivation to reflect:

Main goal is to give the patients a good treatment so the healing process is fast and visible »when we do a lysis to patient and on the next day he has no neurological deficits you can say: Good day. Good job – we did it!«

Medical specialist training: education tasks document for appraisal interview using »DocTrain«

Optimizing documentation

Certifications and law restrictions make necessary documented process's using »DFKI-process-app«

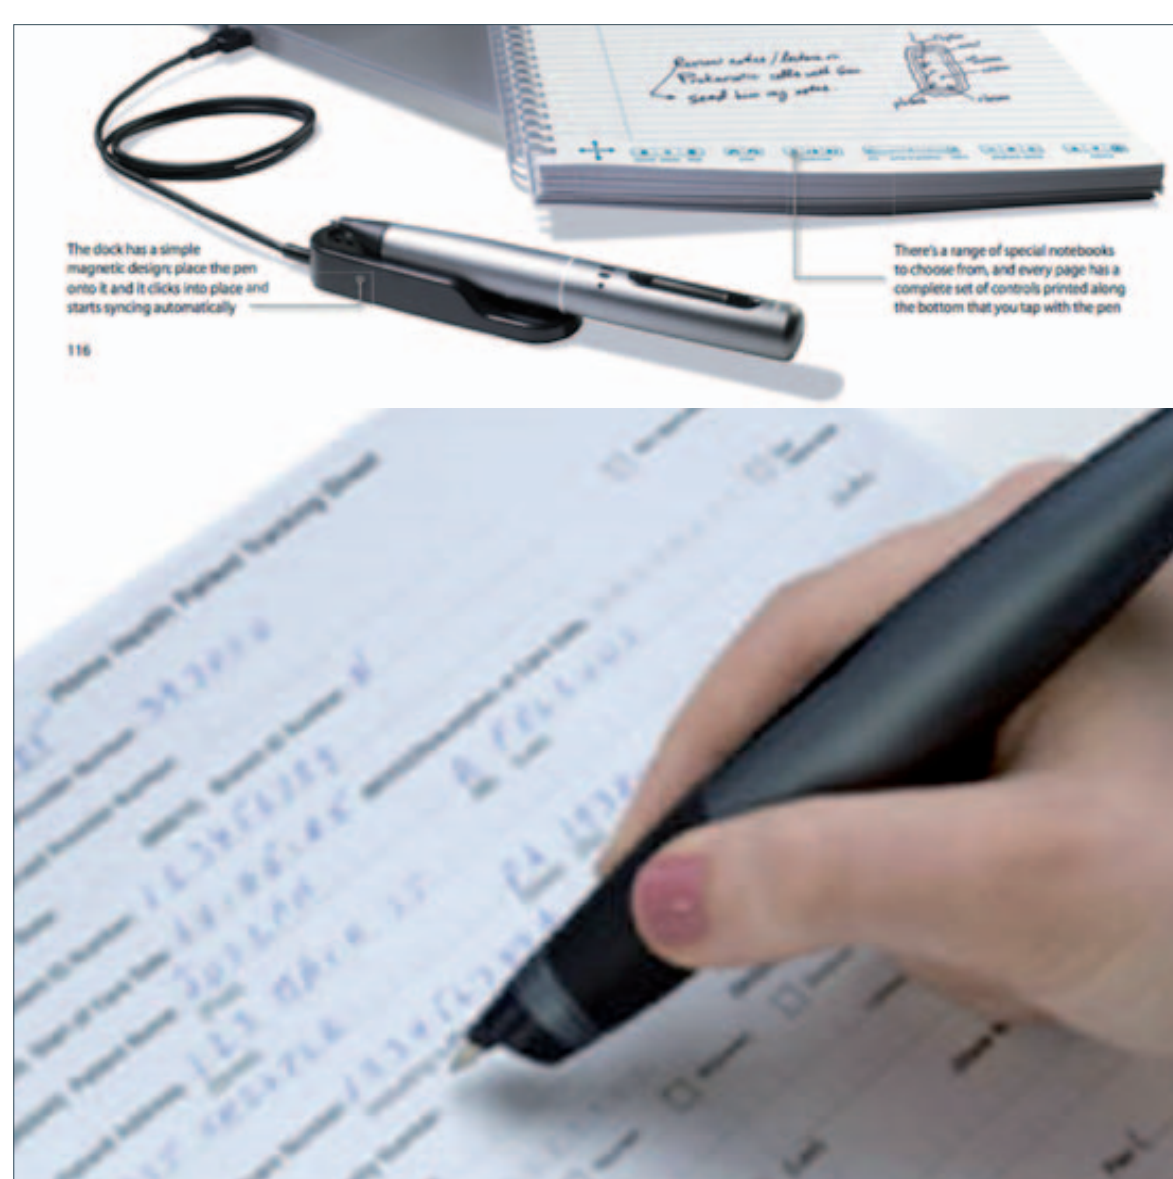

»Employees Stroke Unit«

Complex Training & Knowledge:

Lessons learned, Best practice and prioritisation using »CliniC« and SG Follow Up Workshop

Daily Reflection activities:

Electronic Data Collection & Analysis testing – Shifthandover using »Sensors«
»Digital Pens«
»Talking to relatives«
